

Investor Presentation

May 2024

Cautionary Statements

Use of Non-GAAP Adjusted Financial Measures

This presentation provides financial measures that exclude amortization of acquired intangible assets, acquisition-related expenses, inventory step-up and contingent consideration revaluation, stock-based compensation expenses, revaluation of operating lease liabilities and remeasurement of intercompany loans, amortization of debt discount and issuance costs and tax effect of non-GAAP adjustment, as applicable, and are therefore not calculated in accordance with generally accepted accounting principles (GAAP). Management believes that these non-GAAP financial measures provide meaningful supplemental information regarding Nova's performance because they reflect our operational results and enhance management's and investors' ability to evaluate Nova's performance before charges or benefits considered by management to be outside Nova's ongoing operating results. The presentation of this non-GAAP financial information is not intended to be considered in isolation or as a substitute for the financial information prepared and presented in accordance with GAAP. Management believes that it is in the best interest of its investors to provide financial information that will facilitate comparison of both historical and future results and allow greater transparency to supplemental information used by management in its financial and operational decision making. A reconciliation of each GAAP to non-GAAP financial measure discussed in this presentation is contained in the accompanying financial tables.

Forward-Looking Statements

This presentation contains forward-looking statements within the meaning of safe harbor provisions of the Private Securities Litigation Reform Act of 1995 relating to future events or our future performance, such as statements regarding, but not limited to, anticipated growth opportunities and projections about our business and its future revenues, expenses and profitability. Forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, levels of activity, performance or achievements to differ materially from any future results, levels of activity, performance or achievements expressed or implied in those forward-looking statements. .

Factors that may affect our results, performance, circumstances or achievements include, but are not limited to, the following: increased information technology security threats and sophisticated computer crime; foreign political and economic risks including supply-chain difficulties; regulations that could restrict our operations such as economic sanctions and export restrictions; changes in U.S. trade policies; indirect effects of the Russia – Ukraine conflict; market instability including inflation and recessionary pressures; risks related to doing business with China; catastrophic events; inability to protect our intellectual property; open source technology exposure, including risks related to artificial intelligence; failure to compete effectively or to respond to rapid technological changes; consolidation in our industry; difficulty in predicting the length and strength of any downturn or expansion period of the market we target; factors that adversely affect the pricing and demand for our product lines; dependency on a small number of large customers; dependency on a single manufacturing facility per product line; dependency on a limited number of suppliers; difficulty in integrating current or future acquisitions; lengthy sales cycle and customer delays in orders; risks related to conditions in Israel, including related to the recent attack by Hamas and other terrorist organizations from the Gaza Strip and Israel's war against them; risks related to our convertible notes; currency fluctuations; and quarterly fluctuations in our operating results. We cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this presentation also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Annual Report on Form 20-F for the year ended December 31, 2023, filed with the Securities and Exchange Commission on February 20, 2024. These factors are updated from time to time through the filing of reports and registration statements with the Securities and Exchange Commission. Nova Ltd. does not assume any obligation to update the forward-looking information contained in this presentation.

Nova is a leading innovator and a key provider of **metrology** solutions for advanced **process control** used in semiconductor manufacturing

A TRUSTED PARTNER

We measure ourselves by our ability to transcend expectations and boundaries

We partner with our customers to craft innovative process control solutions enhanced with unique value

Revealing the Invisible

Actionable Insight, Critical Foresight

Solid Track Record

🏭 New Fab facilities / construction in 2024

Next-Gen Dimensions Driven Opportunities

Scale and Complexity Drive Metrology Intensity

- Scaled Devices, Multiple Design Steps
- Moving toward 3D architectures
- >X2 interconnect layers

Logic

- GAA individual Nanosheets (thickness, indent)
- Buried structures

DRAM

- High-Aspect Ratio Bottom gate parameters
- Tight contact holes

Advanced Packaging

- Buried structures
- Topography & Profile

NAND

- High-Aspect Ratio Bottom parameters in multi tier
- Full profile

Next-Gen Materials Driven Opportunities

Materials Diversity Drives Broader Metrology Scope

- From 12 to 67 elements
- New materials, new chemistries
- Composition, purity, stability
- Sustainability and waste management

On-Wafer

- Uniformity & Residues
- Dielectric composition & thickness control
- Stress & strain on multiple nanosheets
- Doping control
- TSV filling

In-Bath

- Optimal plating
- Highly saturated bath management
- By-Products
- Contaminants and photoresist leach

Increasing Complexity

Driving Higher Metrology Intensity

Process Steps by Node - Logic

Process Steps by Node - NAND

Capital Investment Per Wafer (\$K)

Increasing complexity:
14nm-5nm process steps
Increased **30%** per node

Cost of a large
3nm fab:
~ \$25B, 3X of a 28nm fab

HBM3E consumes ~X3 wafer
supply as DDR5

Diversified Growth Engines

specialty
devices

Nova TAM
+50% by 2027

Heterogenous Integration Driven Opportunities

Continued Scaling Requires New Integrations

- Wide Adoption: Advanced Logic, HBM, 3D NAND, 3D DRAM & advanced packaging
- CMP process control critical for successful hybrid bonding
- Backside power delivery and HBM drive TSV dimensions reduction

Hybrid Bonding

- Wafer edge profile
- Backside Thinning
- Cu dishing
- Through Silicon Via

Through Silicon Via

Logic: Backside Power Delivery

DRAM: High Bandwidth Memory

- TSV Dimensions: profile, depth & asymmetry
- TSV reveal
- TSV PR Patterning

Our ESG Vision

To become an active influencer in creating a more sustainable and equitable future.

We believe in a pragmatic approach to interlace ESG practices across daily operations, including culture, products, business, supply chain, customers, R&D and manufacturing.

Our four Pillars

Our ESG strategy is built around four pillars- each with long-term goals and areas of focus. Annual planning and investments will align with these pillars

Governance

As our compass

People First

The individual as a whole & our community as our home

Innovation

As our mission

Environment

As our obligation

Nova's Priority ESG topics

Governance

- Governance compliance
- Data Privacy & cyber security
- Ethical business practices
- Product safety and quality
- Supply Chain and Procurement Management

Social

- Talent Attraction & Retention
- Diversity, Equity and Inclusion
- Human capital development
- Occupational health and safety

Environment

- Environmental management –
- Energy, water, waste
- Carbon footprint and GHG emissions

Key Takeaways

Positioned for Continuous Growth

Process complexity, new markets and geopolitics drive investments

Increasing need for advanced metrology solutions

Unique, disruptive technology portfolio

Stronger position, penetrating new segments. expanding TAM

Solid operational model

Supports clear strategy for growth

Proven performance towards 1B\$

Outperforming the Industry
